HIGH DEFINITION PRINTING ON CHOCOLATE

We can reproduce a logo, picture or text with great precision on the top of filled chocolates or on thin chocolate bars. The element that is to be reproduced is edited on a computer and printed with food colouring on a transfer sheet covered in cocoa butter. The print is then transferred onto the filled chocolates or onto chocolate bars.

For best results, it is recommended to print the image on white chocolate surface. It is also possible to print on milk chocolate with some high contrast images.

Production time can be quite short (2 to 7 days depending on the quantities), except in holiday periods (Christmas, Valentine's Day, Easter) when you should expect longer delays.

Ideally, we work from photos or images of good quality JPG format that you can send us by email at info@ericochocolatier.com.
